

USB485**USB/RS-485/422 converter****一、 Usage**

USB/RS-485 converter (model: USB485) is used to convert USB to RS-485 (half duplex) or RS-422 (full duplex) 。

二、 installation

USB485 is an 1.5 meter long wire including USB port and RS-485/422 terminals. The drive software is in a CD-ROM and it is the same as BOSI USB232.

How to install the driving software

1. Start computer, be sure the USB port is OK.
2. Connect the USB485 to the USB port of computer. The computer will auto detect the device and display: "Find New Hardware", push "Next".
3. Insert the CD-ROM to driver of computer, select "Search for the best driver for your device", then "Specify a location" and "E:\WinXP" (WinXP for example, CD-ROM driver is E: for example).
4. Windows will find (SER9PL.INF) and display USB to Serial Cable. Select "Next".
5. Windows then display "Find New Hardware" again, select "Next".
6. After all installation by Windows, select "Finish".

You can search "control panel", "system\device manager\port", and you can find a new COM port. Remember that is the port of USB485.

7. If you want to uninstall software of USB485, just run UNINSTALL.EXE in the CD-ROM
8. The software support WINDOWS, MAC OS, Linux.

三、 Characteristics

- Insert to USB port directly, no power needed!
- Deliver 5V power to other device.
- RS-485 and RS-422 !
- The driving software is the same of BOSI USB232.
